

## Audax THE ONLY PHASE 2 SECURITY SME EVER FUNDED IN THE UK BY THE EU H2020 INSTRUMENT

Body Worn Video pioneers Audax Global Solutions are showcasing at the UK Security Exhibition in London's Olympia - from the 29th November to 30<sup>th</sup> November 2017.

The UK based digital technology company was funded by a grant under the EU's Horizon 2020 program to fund research and innovation, to develop a body worn camera with live streaming capabilities that would become the Benchmark for the market. Integrating High Security and encryption with GPS mapping and lone worker safety features all in a rugged and lightweight form this disruptive innovation would aid in the protection and security of all citizens and officers.

Audax will join a number of international companies exhibiting at the London security showcase", said Audax director Adam Liardet. "We can assist other organizations thinking about this path in obtaining funding for their innovation, however we understand that the European Commission will also be in attendance with their own stand at D2. They are giving a talk on funding too on 30<sup>th</sup> November at 1500 hrs.."

Mr Liardet, said: "We are in the process of going into preliminary manufacture of our new camera system Bio-AX and would welcome any enquires at our stand"

"Although our project is for two years, Audax after successful field trials and pilot demos are now looking for early adopters to celebrate UK and EU security innovations ."

This project has received funding from the European Union's H2020 research and innovation program under grant agreement No 719806

**Audax Global Solutions is one of the UK's leading digital evidence-gathering technology companies having been involved in the pioneering of the body camera market since 2005.**
