

**CloudPod**

**LAPTOP EDITION**

**POWERFUL PORTABLE WiFi**

## POWERFUL PORTABLE CONNECTIVITY

*Discreetly installed inside a standard 15" laptop bag, the CloudPod is a powerful self contained dual LTE, WiFi and wired internet connectivity solution, providing reliable high bandwidth network access on the move.*

### Multiple Networks

With support for upto 4 mobile network operator SIMs the Cloudpod provides connectivity everywhere.

It can also be plugged into a wired internet connection or connected to an existing WiFi hotspot.

### Go Anywhere Connectivity

With Battery Backup and designed to fit in any 15.6" laptop Bag, the CloudPod is easily carried anywhere.

It can be powered from a car or portable battery packs, from the mains or even via solar panels.

### Mighty Performance

The seven integrated antennas harness LTE signals and provide GPS tracking and dual band WiFi.

It includes the ability to combine multiple connections into a single reliable bonded link.

## Technical features

- Dual 4G/LTE Cellular Enabled Router (Upto 4 SIMS).
- WAN & LAN Ports allow for direct wired connection
- Integrated dual Mimo , dual WiFi & GPS Antennas
- Integrated UPS Battery for uninterrupted use.
- Enterprise grade routing hardware with support for VPN
- Load balancing & Bonding of all WAN links possible.
- Designed to fit in any 15.6" Laptop Bag

## Technical Data

<b>WiFi</b>	Simultaneous Dual-Band 11ac Wi-Fi
<b>WAN &amp; LAN Ports</b>	1GbE (RJ45)
<b>Throughput</b>	Upto 400Mbps
<b>Technologies</b>	Internet Load Balancing, Bonding, Aggregation & Enhanced Session Reliability (Supports VoIP)
<b>DC Power</b>	8-40V DC Input 18W Max
<b>Weight</b>	5kg
<b>Dimensions</b>	Width 266 mm, height 366 mm, depth 49 mm

The Cloudpod is comprised of proven enterprise grade components in a custom enclosure.

**Component Certifications:** FCC, CE, RoHS, E-Mark, EN 61373:1999 IEC 61373:1999 Shock and Vibration Resistance, EN 61000 Electromagnetic Compatibility.

## Integrated UPS Battery Backup

Integrated into the CloudPod Laptop Edition is a 85Wh battery backup solution that provides temporary power when the main power input is lost. This backup battery keeps the CloudPod powered up and online as it is moved between power sources in vehicles and offices. The CloudPod can be powered by battery alone for up to 4hrs - with extended runtime hot swap battery power options available.
