

ENVIRONMENTAL STATEMENT

As a company, Audax is committed to the communities in which it works and wishes to reduce any adverse impact on the environment arising from the activities of its business thereby contributing positively to environmental wellbeing and conserving resources.

We recognise however, that in our day-to-day operations we inevitably impact on the environment in a number of ways and we wish to minimize the potentially harmful effects of such activity wherever and whenever possible.

As part of our continuing drive for quality in all things we do, we have therefore developed an Environmental Policy Statement which will enable us to set the targets by which our efforts towards sustainable environmental improvement can be measured and monitored on a regular basis.

We have undertaken to help every employee to understand and to implement the relevant aspects of this policy in their day-to-day works through the regular communication of objectives, action plans and achievements.

At Board level, an Audax Director has specific responsibility for policy development, coordination and evaluation of performance. Audax is committed to minimising the impact of its operation on the environment by means of a programme of continuous improvement.

In particular, Audax will;

- meet, and where appropriate, exceed the requirements of all relevant legislation - where no regulations exist Audax shall set its own exacting standards;
- promote recycling and the use of recycled materials, while reducing consumption of materials wherever possible;
- minimize waste, especially hazardous waste, and whenever possible recycle materials. We will dispose of all waste through safe and responsible methods.”
- work with Audax suppliers to minimise the impact of their operations on the environment through a quality purchasing policy;
- encourage the implementation by all Audax people of sound environmental practices;
- implement our policies through guidelines and training; and
- monitor progress and review this statement on an annual basis
