

## ROHS COMPLIANCE STATEMENT

### RoHS (Restriction of Hazardous Substances) Directive

The RoHS Directive 2002/95/EC came into force in Europe on 1st July 2006. This Directive restricts the use of certain hazardous substances in electrical and electronic equipment put on the European market after this date. As of the 1st July 2006 any electronic or electrical equipment sold within the EU must not contain more than the permitted maximum levels of these six hazardous materials.

Some people mistakenly refer to this Directive as 'Lead Free'. There are in fact six substances restricted under this Directive with lead being one of them. The six restricted substances and the concentration value in a homogenous material are listed below.

<b>Hazardous Substance</b>	<b>Maximum Level</b>
Cadmium (Cd)	0.01% (100ppm)
Lead (Pb)	0.1% (1000ppm)
Mercury (Hg)	0.1% (1000ppm)
Hexavalent Chromium (CrVI)	0.1% (1000ppm)
Polybrominated Biphenyls (PBB'S)	0.1% (1000ppm)
Polybrominated Diphenyl Ethers (PBDE's)	0.1% (1000ppm)

Our preferred Manufacturing Partner has been producing RoHS Compliant assemblies since May 2005
